TOPLINE

Launch cadence + lunar surface ops are leading today's signal mix.

The European private space launch provider Isar Aerospace, headquartered in Ottobrunn, Germany, is planning to fly its Spectrum small satellite launcher on its second flight. About a year after Spectrum's first flight failed, the company has scheduled the "Onward and Upward" mission for launch on Wednesday, March 25, at 20:00 UTC from the Orbital Launch Pad at the Andøya Spaceport in Norway. The launch window lasts until 20:50 UTC.
